SESAMES Awards 2013

And the winners are...

Ten companies are celebrating this morning after the winners of the **SESAMES Awards** were announced at a gala reception in the Automobile Club de Paris (pictured above) last night. The purpose of the 11 awards – the Oscars of the secure payments industry – is to recognise and reward the sector's best innovations every year.

From cloud technology to voice biometry, from advanced e-passports to product which will help protect Brazil's Amazon rainforest, via a video screen which allows users to exchange information by just placing their NFC phone near it, the winners of 2013 are incredibly varied – but have one thing in common: excellence.

The judges, who are all experts in the industry, arrived at their decision after lengthy deliberation, whittling down the SESAMES list from more than 30 high quality finalists – and over 300 first-round submissions. Think&Go NFC can be forgiven for having the broadest smile this morning – the French firm won two of the coveted trophies: in the Mobility category

and the Discovery prize. And the winners of the awards are:

IDENTIFICATION/ID CARDS/HEALTH

Infineon Technologies (Germany)

IT SECURITY

CipherCloud (USA)

TRANSPORTATION

Card4B Systems S.A. (Portugal)

BANKING/RETAIL/LOYALTY

Airtag (USA)

MOBILITY

Think&Go NFC (France)

TRUSTED INTERNET/AUTHENTICATION

Oberthur Technologies (France)

E-TRANSACTIONS

SCCP Group (France)

MANUFACTURING & TESTS

Secure-IC S.A.S. (France)

SOFTWARE

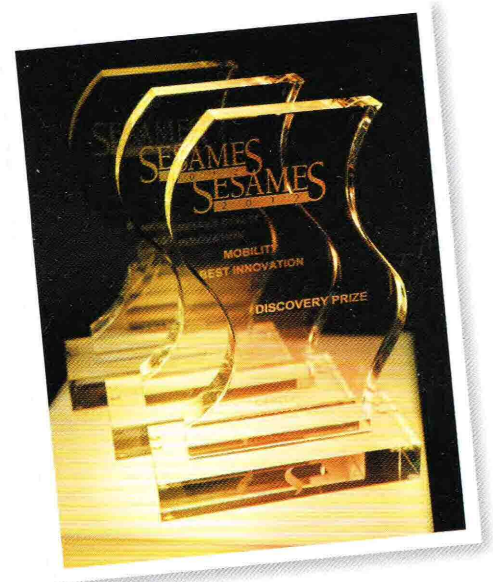

Giesecke & Devrient (Germany)

HARDWARE

Gemalto M2M (Germany)

"DISCOVERY" Prize

Think&Go NFC (France)

• Turn to page 5 for a more detailed list of winners and their products. We will have in-depth reaction and pictures from the SESAMES Award winners in tomorrow's CARTES Daily News.
